

Newall's B60 Milling Machine Package offers unprecedented value for your turret or knee mill. The DRO is housed in a rugged die cast chassis and is available in two or three axes. A tactile feedback keypad ensures long life and the crisp and clear LEDs make it easy to read even at a far distance and a wide viewing angle.

Best of all, the B60 comes with Newall's Spherosyn and Microsyn encoders that carry an IP67 environmental rating and are recognized throughout the world for quality, accuracy and reliability.

The B60 Milling Machine Package is covered by Newall's unmatched **5 Year Warranty** and its **3 Year No-Fault Warranty** that covers accidental damage and mis-use.
